

**Hazard Vulnerability Assessment Study of the Master Plan
Notice of Work Session**

The Borough of Ho-Ho-Kus Planning Board is conducting a new Hazard Vulnerability Assessment Study (HVAS) as part of the Borough's Master Plan. This land use document will be part of the critical municipal efforts to create a more sustainable and resilient community. As a changing climate continues to influence our natural and built environment and appears to be impacting our communities at an increasingly greater rate year after year, it is incumbent upon every municipality to incorporate basic land use principles, policies and specific recommendations to address this issue.

The Borough Planning Board is conducting a work session to discuss this land use study, to provide an overview of the issues and to offer opportunities for input into the study. The work session will be held on Thursday, February 15, 2024 at 7:00PM in the Council Chambers of the Ho-Ho-Kus Municipal Building, 333 Warren Avenue, Ho-Ho-Kus, NJ, as part of the Board's regular meeting agenda. The Planning Board encourages the public to attend this meeting to hear about the study and to seek input.

JoAnn Carroll
Planning Board Secretary
