

Construction of upgrades and improvements to the Ho-Ho-Kus Water Treatment Systems were financed by the New Jersey Water Bank (NJWB). The NJWB is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank (NJIB) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the NJIB to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will benefit the community by upgrading the existing treatment facilities to comply with current NJDEP drinking water regulations. This will allow the Department to continue to provide safe drinking water to all residents in the existing Ho-Ho-Kus Water Department service area.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
